W03-P2: show reviews[0] info when DOM is loaded

The screenshot shows a web application running in a browser. The browser window displays a page titled "Our Reviews" with a review card for Susan Smith. The review card includes a profile picture, name, job title, and a paragraph of text. A "Surprise Me" button is at the bottom of the card. The background shows the Visual Studio Code editor with the JavaScript code for the application. The code includes a `DOMContentLoaded` event listener that logs the first review item and updates the card's content. The console shows the logged object.
